CORONAVIRUS PROTOCOLS

At Chateau, our top priority is the health and safety of our patients and staff. Our team has implemented specific COVID protocols according to guidelines recommended by the CDC in order to not only protect current patients and staff, but also those looking to start their recovery journey in the future. Chateau’s coronavirus protocol includes such measures as:

- Screening for coronavirus before admission
- Thorough cleaning and sanitation of facilities and supplies on a regular basis
- Asking staff to remain home if they exhibit any symptoms of coronavirus
- Continued monitoring of all patient’s health and signs of COVID symptoms
- Reducing the amount of close contact among patients and staff
- Readily available cleaning supplies and hand sanitizer

REHAB BENEFITS

Regardless of your location, treatment may be a safer place than your current living situation. Along with a more controlled environment that is separated from the outside world, rehab also offers a hospital-like setting with medical personnel on staff.

If you or your loved one is struggling with addiction, the time may be now to get professional help. We offer extensive options for substance abuse and mental health treatment.
PREVENTING THE SPREAD

Along with our specific COVID-19 protocol for rehab, the Center for Disease Control and Prevention (CDC) has outlined some tips on preventing the spread of coronavirus including:

- Washing hands regularly and thoroughly with soap and water
- Using hand sanitizer
- Avoiding touching your face
- Cover your mouth & nose when sneezing or coughing & wash your hands after
- Distancing yourself from others
- Avoid contact with anyone who may be sick
- Stay home and isolate yourself if you are feeling sick
- Disinfect frequently trafficked areas or touched items

EVOLVING PROCEDURES

As information on the coronavirus continues to evolve, we are examining our procedures closely and updating our procedures and policies as necessary. We will remain open and look forward to continuing to provide critical treatment and resources to the millions of people suffering from the disease of addiction and mental health issues.
#StopTheSpread

7 Steps to prevent the spread of COVID-19

01 Wash your hands frequently
02 Avoid touching your eyes, nose, and mouth
03 Cover your mouth when you cough using a tissue or the bend of your elbow
04 Avoid crowded places and close contact with anyone who has fever or cough
05 Stay home if you feel unwell
06 Seek medical care early if you have a fever, coughs, and difficulty breathing—but call first
07 Get information from trusted sources
